

I Fought You from the Skies By Willi Heilmann

Willi Heilmann served as a Luftwaffe fighter pilot in the Third Gruppe of the 54th Fighter Wing (III/JG 54) during the Second World War seeing action on both the Eastern and Western Fronts. I Fought You from the Skies Willi Heilmann was an experienced Jagdflieger (fighter pilot) who served with the Third Group of the 54th Fighter Wing (III/JG-54) in the West from the Spring of 1944 to the end of the war in May 1945. It shows the bravery fear and mounting fatigue of a group of German fighter pilots who did their utmost to try to maintain Germany's hold in the West only to be gradually pushed back to the frontiers of the Reich and into the heart of Germany. I Fought You from the Skies Possibly no book ever written more vividly captures the drama of air combat than this astounding personal log by one of those young men with an average life expectancy of four weeks - a Luftwaffe fighter pilot during the last year of the Second World War,

An exceptional account of the air war over the skies of Europe in the last days of WW2, Not a lot of combat level WW2 out there from a German POV especially the Luftwaffe, This is his story full of hair-raising escapes from fierce dogfights over France and Germany, This book is also a commentary on the Luftwaffe's final attempt to regain air superiority prior to and in the aftermath of the Allied landings in Normandy. I Fought You from the Skies Good book. Overlooked memoir from the other side. I Fought You from the Skies.
