

Rebound by Lynette Mae By Lynette Mae She realizes that whatever she thought she had done what she thought of as hard work and suffering was nothing compared to those who fight to overcome disability or survive combat. I mean really who could ask for anything more in a book than to be run through a plethora of emotions? I was pleased to see an appearance by Mac a character from both Faithful Service and Tactical Pursuit (Side note if you haven't read those get on it!). Buy the book it's money well spent! Lynette Mae When your whole way of life changes in a split second how do you move forward? Strength and determination as well love . Lynette Mae has definitely hit a three-pointer in this book and I look forward to her next book! Lynette Mae I liked this story for the most part Connor was a great character and watching her come to terms with her injury and reclaim her life was uplifting. Lynette Mae This was a great story of overcoming a tragedy and finding a new purpose in life as well as love Lynette Mae Women's basketball star Conner Maguire has the world by the tail. Shawn Tyler a beautiful warrior with a shattered heart and incomparable spirit may be the key to conquering her fears if Conner can open her heart enough to see the world from a new perspective:

Lynette Mae left a small town in Pennsylvania to serve in the US Army: After her honorable discharge she found herself in Florida diving into a law enforcement career: Although completely challenging and satisfying being a cop only fueled Lynette's true passion: Writing. Her life's rich experiences provide endless inspiration for action packed stories with plenty of romance: When she's not serving her community or writing you can find LM running weight training or any number of physical pursuits. For quieter time she'll be curled up with a book or just enjoying the day with her wife and their dogs. What's next from the mind of Lynette Mae? Stand by...Conner Maguire is at the top of her game - literally, She is a world class basketball star negotiating contracts and sponsors in a high power relationship and has just set the league points record. Her sporting life is over her relationship in tatters and her self worth destroyed. A Vet suggests she tries out a differently-abled sport and she begins to find a new sense of self and a new sense of direction, But whether she can open up her heart to another wounded soul remains the biggest challenge, -----
-Lynette Mae has written a lovely book that traces a life-changing journey: At the start of the novel Connor is wrapped up in her sport her career and her life, She is rather self-centered without meaning to be just a little full of her own success and importance... and not helped by completely selfish Management and PR, I didn't really engage with her on an emotional level in the first part of the book: But whether this was intentional or just the scene setting tone as the novel progresses and the accident makes Connor reassess and grow she becomes an increasingly likable character, She moves on from the world of power and prestige to become a better person. We written well paced and full of wonderful characters 'Rebound' is a most enjoyable read. Juxtaposing the vicious Victoria with the struggling Shawn (Coach) Tyler gives us insight into what is really valuable: The supporting cast of Elvis (yes really) Andi Diane and Red add depth and substance to the relationships, Their friendships form the network in which Connor finds the strength to survive and grow. Lynette MaeThe dialogue is great the relationships believable and the characterization of people suffering from various forms of disability show real insight. On top of which we have the internal struggles of Vets suffering PTSD that adds another layer to the pain of survival. A book that shows us how adversity can be the catalyst for growth and to finding what we really wanted from life. And a lovely touching romance that brings two wonderful survivors together. (publisher review copy received)
Lynette Mae This is a book that has bounced on and off my maybe pile. I finally pulled the trigger and read despite the ugly opening because I'm on a search at the moment for the other, Like this book here has both someone in a wheelchair and a person of color, Unfortunately I couldn't really get into the story for some reason: With Connor Maguire acting like a doormat and being all whimpery about towards Victoria, Lynette Mae Very interesting read I loved the insight into the trials of differently abled people, It makes you think about simple things that you do on a daily basis which are mammoth tasks for others, I also loved the few lines of Gaeilge can't beat a bit of Irish!
Lynette Mae I thought this book was decent. I do have to give it credit for being one of the only

LesFic books I have read with a main character that was paralyzed from the waist down. I think Mae did her homework and tackled this extremely well: What stopped this from being more than 3 stars for me was how I connected with the book, I felt like I was watching a black and white TV from far away, The story was there in front of me but still distant and it stopped me from feeling immersed in the book: I liked the main characters but again I didn't really connect with them. You do feel more for Conner especially in the beginning of the book but she too drifts away a bit: Shawn on the other hand has a tough shell that never really cracks enough to get to know her: I was disappointed that the book didn't have more of this. The ending especially got a bit dopey in which every problem was fixed in this grand way: when I would have just settled for an exciting game of basketball. Lynette Mae When I read the blurb for this book I was intrigued for two reasons: One I have enjoyed everything this author has written novels and anthology submissions. I cringed I laughed I cried I cursed I gasped and then at the end I said I want more!: It was nice to see a positive model of the male gender so intricate to Connor's recovery life: A timely example of a war veteran who has seen and experienced more than I can ever imagine. Seeing just a glimpse of what her life after service is like was eye opening even for someone who has friends and family that served in the military, All in all I was extremely pleased with this book and I would recommend it to anyone, Thank you Lynette for giving us the gift of your storytelling and for your service to this nation, New and old friends help to pave the way to a new purpose in life, Lynette Mae I love supports themed books in particular books about basketball. This book pulled at my heartstrings because it was thought provoking on the sense that this could really happen, I play both basketball and softball and one wrong hit can change everything, I was glad we saw both struggles with Connor's accident and Shawn's PTSD. I'm also glad they didn't just try to have her start walking at the end. There's still going to be a struggle and still going to be room for good and bad days, There more to learn and more for these characters to go through I think: It charts the story of a woman who has to take a different look at life after an accident, Conner is a wonderfully written engaging and strong character she is very human yet inspiring beyond words. I won't go into the plot because I would rather leave the book to speak for itself. It's the kind of book that leaves you with a life-affirming and uplifting feeling that makes you feel that life may change the playbook but you can still score the victory. Shawn was a bit harder to like since she changed personality every other page. I've knocked this down a star because I was rolling my eyes towards the end with all the things the team had to overcome, Accident insurance gym repairs injuries to characters just seemed like one contrivance after another: And the book just kind of ends without resolving many of the plot points that are laboured on over the course of the story. The supporting characters were fun and interesting and the romance between Connor and Shawn was sweet once it got going and that was enough to keep me reading: She's at the top of her game in demand and life is good, One day the unthinkable happens and her world is ripped apart, That split second event forces Conner to re-evaluate her entire existence. When the unthinkable happens Connor is left with nothing. Didn't help that the book opened the way it did. Interesting enough story. I admit I liked the first part/half better than second. I kind of got into a skimming mode there. Which is frustrating. And unfortunate. What I found very interesting was the wheel chair basketball. Two it addressed a rarely seen topic. differently-abled characters. This book has so much I'm not sure where to begin. I just loved Elvis. Andi is a joy as the ever faithful best friend. And of course there is Shawn. That's how. Family support is also key. It made it feel more believable. Lynette Mae This book is absolutely wonderful. Rebound by Lynette Mae
